I purchased Marsha McCloskey's feathered star ruller at the same time, so as soon as I get a few other projects out of the way I'll be experimenting with these. Be aware, the book literally describes these blocks as taking a long time to make, so it's a great book if you would like a challenge as a quilter, else you can just enjoy the pretty pictures.3 of 3 people found the following review helpful. she makes it easy to do very complicated patternBy Fiona PottReally difficult patternsvery frustrating to piece. I prefer the paper piecing feathered star patterns by Carolyn McCormick, she makes it easy to do very complicated pattern.0 of 0 people found the following review helpful. On my "to do" list!By L. HugginsHave not tried these yet, but this is on my "to do" list and the pictures are inspiring!

Really Hard Blocks That Take a Long Time to Make Inside you'll find patterns for 10 Le Moyne based Feathered Star blocks. The smallest finishes at 12", the largest, at 38". Some are given in more than one size. Design and shading suggestions are given throughout. Some of the stars in this book, like the Double and Triple Feathered Stars patterns, are "really hard and take a long time to make". Others are fairly straightforward. All the blocks have a traditional look too them, but some are actually original blocks designed just for this book. The patterns are written for rotary cutting and machine piecing. Templates are provided for checking purposes, and for quilters who prefer more traditional techniques.

About the Author Marsha McCloskey is a well-known teacher, lecturer, and author of over twenty books on quiltmaking. She is best-known for her work with Feathered Stars, a group of intricate designs popular with quilters who love piecing. These amazing quilt blocks have long been a benchmark of achievement for quiltmakers. In the 1800s, quilters often saved their best fabric and best work for these designs. Marsha has been collecting the patterns for 20 years.
