Editors of Fine Woodworking : Fine Woodworking 2015 Magazine Archive before purchasing it in order to gauge whether or not it would be worth my time, and all praised Fine Woodworking 2015 Magazine Archive:

By T. jefferson As a long time subscriber, I am a lucky owner of practically every issue of Fine Woodworking, minus perhaps one or two, but knowing where to find the particular article, even with the printed indexes, can be very problematic. This DVD solves that problem nicely. If you are not fortunate enough to have paper copies this is pretty good substitute, but it is a bit awkward. Even on a reasonably size monitor I have to blow up the print and then scroll back and forth to read it. And, of course, if you want to use the information as a step by step guide

in your shop you will have to print it out. This is a drawback of any DVD of this type and the reason I give it only 4 stars. Compared with other similar DVD's I own this is excellent and the search feature works fine. 0 of 0 people found the following review helpful. Defective media; poor search engine. By John P. Callan The other reviews that complain about the FWW Archive 1975-2015 DVD version having a rotten search engine are not exaggerating. I accidentally put two blanks between keywords, as in the string ' narrow blank-blank kerf ' w/o quotes, and it returns no results. Someone must offer a better search engine Taunton could license for distribution than this mess. Problem 2: The DVD arrived with the center hole punched slightly offset, so my Dell's super hot Pioneer Blu Ray Burner BDP-207D made the entire computer tower shake when it brought the DVD up to read speed. The smart firmware in the Pioneer struggled to read the disk by slowing the rotation rate down, but then speeding up again when the optical signal quality was very good, only to need to slow way down again. It did finally settle on a very slow speed, but ran hours installing the disk. 0 of 0 people found the following review helpful. Great articles and plans By Robert Baker Everything I was hoping for! Great articles and plans!!
