4 of 4 people found the following review helpful. Do You Like a Romantic Floral Style?By L. M. KeeferIf you love a romantic, floral style with chintz, antiques, color, and blooms of all kinds, you will probably love most of the rooms in this book. The author is a former editor of COUNTRY LIFE and THE WORLD OF INTERIORS and lives in England where floral fabrics and design blossomed.This book "celebrates the decorative potential of all things floral" - from fabrics and furnishings to accessories. Organized by styles and colors, the diversity of floral design is highlighted including faded and bright palettes, monochrome florals, rainbow florals, large and small pattern florals, flowers in bud and bloom, botanical designs and inspiration from India and China.Next the reader is taken on a color tour to see rooms in red, yellow, blue, green, white and multicolor combinations. There is accompanying background on the history of floral decor. Some of the rooms featured I hadn't seen before and are jaw-droppingly beautiful. There are some charming Colefax Fowler classic prints featured, too.If you love chintz, English design, romantic rooms, and flowers, you should find this book of interest. The photography is splendid and the color vibrant. My only wish was

that there were more full size images of entire rooms as that's what I love seeing most. There were enough to satisfy. I love having this book in my library as that romantic floral decor is my favorite style. I love feeling like I'm living in a summer garden in my rooms. If you love floral fabrics and furnishings, which are hard to find, you should love this book. 2 of 2 people found the following review helpful. Do You Like a Romantic Floral Style? By L. M.
