Franco Pavarin, Luciano Spaggiari : Fold-And-Fly Paper Airplanes before purchasing it in order to gauge whether or not it would be worth my time, and all praised Fold-And-Fly Paper Airplanes:

1 of 1 people found the following review helpful. Boy airplane making fantasy comes true By Maciej Kawalkowski Got this for my 10 year old boy after he had this book from the library. He fell in love with the multiple designs. This book kept him busy for days and turned our home into an airport. Great book for kids and adults fascinated with flying paper airplanes. 0 of 0 people found the following review helpful. Fold-And-Fly Paper Airplanes By Jan Rallings-Kelly I purchased this book for my friend who tutors a nine year old boy. After they finish their studies, they fold fancy airplanes and fly them. They are both learning and having a blast at the same time.

These aren't your basic paper planes -- they're even more fun to make and fly! With a twist and a fold, you can have a fabulously detailed and varied fleet of multicolored origami paper flyers. Along with complete instructions for building these 15 models, you get full-color photos, an introduction to paper plane races, ideas for launching planes with rubber bands, and aeronautic terminology. Try making a "Kir-Z Alien Spaceship", a hydroplane, a Stealth Spotter, a bomber, a multiple fighter, and 10 more.
