A Great Family Fun Project!By Del Pinto[[VIDEOID:a136b739a52c3da2bb10a887823e1f60]] This kit from Rock Point is so unique. I have never seen origami paper or paper airplane paper preprinted with folding instructions and graphics from famous flying machines such as the space shuttle but that is just what is included in this kit!Aside from the preprinted paper in 2 sizes there is also pretty printed paper with colorful patterns in 2 sizes.You can fold the preprinted paper without looking at the folding instructions or you can follow the excellent tutorials in the book. Either way it is loads of fun, and that is event before you start to fly them and alter them with slight curves and bends that are suggested in the book.I plan on making a mobile with the paper airplanes after we toss them around a bit and see how far we can get them to go. This would make an excellent gift or an activity for a long flight-keeping with the flying

theme!
