I'm not sure that I agree with that statement. The designs are lovely and have a sweet cartoon quality to them but they are not easy and simple enough for young children to color. They have some areas that are intricate and small and require something more than crayons to work with. The subject matter spans the age of a family but the artwork is geared towards older children and adults.While I absolutely

love the designs (and that is why this is a four star rating instead of a three star one), there are some problems that are hard to overlook. I note below that there are issues with the binding and printing but those I can and have accepted with others books. The real issue with this book (and the others in the same line) is that the artist/publisher have colored in way too much of the designs. It is one thing to have the background colored but to have major portions of the designs colored in is simply a bad decision. It is next to impossible to match the colors used and, in this book at least, the color palette used is the same in each and every design. That doesn't allow for much creativity for the colorist of any age to work with. I'm trying to color over some of the pre-colored areas but it still has an effect on the final color and I can't get it to match even with my large range of medium. The true saving grace is the this coloring book is the beauty of the designs. If the book had been published with no coloring done, I would have much preferred it. I have also purchased Extraordinary Machines in this line and have the same feelings about it. I've seen that they will be releasing more books in the fall and I am hoping that they will stop coloring the designs for the colorist. This slightly oversized coloring book is printed on both sides of the non-perforated page. All of the designs have unfinished elements at all sides of the page. Three of the designs spread across two pages and portions of the designs are lost due to this. The remainder of the designs all merge into the binding. The binding is a hybrid of sewn and glued. It is next to impossible to get this book to lay flat. I broke the spine to get one set flat but then was unable to do so for any other pages without tearing at the binding. All alcohol-based markers bleed through this paper rapidly. While fine point water-based markers also bleed through, ultra-fine points (such as Stabilo 88 and Staedler triplus fineliners) and Tombow dual end brush tip, do not (note that the fine point of the Tombow does bleed through.) My gel pens (all brands and point sizes) worked well with the paper. My coloring pencils worked great as well and produced the results expected for the type of pencil lead used. My soft lead pencils were easy to lay down color and blend especially well. I will list in the comments section of this review the coloring mediums I used in testing this book. 0 of 0 people found the following review helpful. Cute and fun By Ionia Froment Not a bad book, the pictures are cute and simple. There are pictures on both sides of the page so you will have to be careful which art supplies you use to colour with as they may bleed through. The paper isn't terrible quality, but it can still happen with certain types of markers and pens. There aren't a tremendous lot of pictures in this book, but there is a nice collection of themed images to keep any colorist busy. Some of the images are more complex than others, but none of them have extremely tiny spaces so this book would be good for kids as well. Not bad, overall. 1 of 1 people found the following review helpful. Five Stars By C_Leigh Awesome coloring book. One of my favorites!

Everyone loves to color! Now the whole family can relax and enjoy creative time together by bringing to life the lush and marvelous details of the world of make-believe, from Arabian Nights to Little Red Riding Hood to the Frog Prince.
