Except maybe a little more advanced than some reviewers led me to believe. Got these for my 8 year old nephew, who insisted on starting on the "red one" one of the more advanced designs. My brother ended up doing most of the work, but he really likes it so what the hey?! This kit reminds us of something my dad had in the 80s, a kit where you glued layers and layers of paper together to make fancy paper airplanes. We had fun with it, although not so much the nephew it was intended for.1 of 1 people found the following review helpful. DisappointedBy alice travisDirections were too difficult for a 10 year old child.0 of 0 people found the following review helpful. A great book - so many clever ideas of paper airplaneBy Wendy WainwrightA great book - so many clever ideas of paper airplane ... a great Christmas present for a little boy ... he will have lots of fun making the airplanes!

Pop, fold and fly sturdy paper airplanes with this easy origami kit.Origami author Andrew Dewar rediscovered his childhood love of paper airplanes in Japan working with Yasuaki Ninomiya (creator of the famous White Wings planes). His designs are incredibly easy to assemble and his book not only explains how to make the origami planes,

but how to tune them for better performance. He also gives tips on designing your own paper airplane models. All the paper folds are easy enough to be origami-for-kids projects and are a great way to learn Origami. The helpful instruction book inside the kit provides clear, step-by-step folding instructions for each plane. All the planes are printed in full color on high-quality cardstock and pre-cut so you just push out the pieces, fold them and staple them. The rubber band catapult launcher that is included makes the planes soar and swoop to great heights which draws a crowd and keeps kids and adults entertained for hours. If one gets stuck in a tree or on the roof, just fold up another one and you're back in business. Get your kids running around outdoors flying paper airplanes in one minute flat! This paper airplanes kit contains: 12, strong and fast pop-out paper planes Rubber band catapult launcher 32 page, full-color origami booklet Step-by-step instructions Paper folding basics and tips These awesome high-performance planes are frustration-free no glue needed, just a stapler and some imagination. Origami airplanes include: Thunderbird Streaking Comet Wasp Stingray And many more

"The book comes in a glossy box that includes the stack of pre-punched planes and a catapult launcher. Written by a man who has a true passion for paper airplanes, the book has great tips on construction, troubleshooting and flying, plus a lot of smart people stuff about camber and dihedral and lift. There's a built-in science lesson in there for the kiddos. [] The included catapult launcher is really fun. (Do not launch inside the house!) The planes can go quite a ways. I tried several times to get action shots but the launches were always too fast to catch with my camera." mmmCrafts blog "Each of the 12 unique paper airplane models that come with this kit boast detailed designs, vivid colors, and varying styles that will inspire awe in any child that picks up this kit. In fact, it may be hard for them to choose which airplane to fly first! Amazing design aside, the best part of these pop-out planes is that you can truly make them in one minute or less; with no glue required and no complicated folds to make, kids can simply staple their pre-cut airplane parts together and dive right into play time. Kids will have absolutely no trouble constructing these amazing airplanes. Each airplane is printed on high-quality cardstock, too, so your paper airplanes are sure to last for hours of play." AllFreeKidsCrafts blog "I can think of a handful of adult males: fathers, uncles, and teachers who would love this kit to work on with their young ones, or even just for themselves. I, as an adult female, don't usually get that excited about paper airplanes, but I was certainly delighted to see the cool, unique designs of the paper airplanes when I first opened this kit. [] an excellent kit to build together by a parent-child team. Building and flying them together could lead to a great bonding experience." Yuki's Origami Blog "Paper Airplanes: jaden recently started asking me to make him paper airplanes but then i discovered that i'm terrible at it! my planes never seem to fly straight and seemingly fall apart mid air. but these One Minute Paper Airplanes have come to my rescue. making these doodads take a little folding and stapling and voila, cool looking airplanes that actually fly. Perfect summer activity for the backyard." Happily Everly After blog "We were amazed at how high and far the airplanes soared. I squealed with delight as the planes shot up and zoomed through the air, changed direction, glided or swooped and then plunged to the ground. Exciting and thrilling! Hours of learning, outdoor activity and fun." Handmade By Deb blog "Each of the 12 unique paper airplane models that come with this kit boast detailed designs, vivid colors, and varying styles that will inspire awe in any child that picks up this kit. In fact, it may be hard for them to choose which airplane to fly first!" AllFreeChristmasCrafts.com blog "Tuttle's One Minute Paper Airplanes Kit: 12 Pop-Out Planes, Easily Assembled in Under a Minute by Andrew Dewar contains a stack of colorfully printed pop-outs to make a dozen card stock planes, a rubber band catapult launcher, and step-by-step instruction booklet. [] As an author with more than thirty books to his name and two other airplane kits, you're in the hands of an expert. No complicated folds or glue are required - only a stapler." All Things Paper blog "[] All the planes are designed to be launched using a rubber band launcher. You give the plane a light test throw which won't send it more than 10 feet to see if you need to adjust anything- tips in the book tell you how to adjust for drag and various other issues. After you have it ready, take it somewhere you have room and let it fly with the launcher!" Don't Eat The Paste blog About the Author Andrew Dewar was born in Toronto, Ontario, and graduated from Ryerson Polytechnic Institute (B.A. Journalism) and University of Toronto (M.A. Japanese Studies, Library and Information Science) before moving to Japan in 1988. After completing his doctoral studies in library science at Keio University, he joined the faculty of a junior college in Japan. Soon after arriving in Japan he rediscovered his childhood love of designing and flying paper airplanes. His passion for paper airplanes led him to become president of the Fukushima Paper Airplane Club. Dewar has published over 30 paper crafting books and kits. He also teaches paper airplane workshops and does seminars at schools, libraries, community centers and museums. He lived and taught library science in Fukushima, Japan, until the giant earthquake and nuclear accident in March 2011, when the city became unsafe. After a brief stay in Canada, he's returned with his family to Gifu, Japan.
