The arts and crafts intellectual movement - and the architecture and landscaping associated with it - renounced the orderly control and mechanization so symbolic of the Victorian Era, choosing instead to embrace the natural world and the human place within it. This book delves into all that to help the reader understand the philosophy of the movement and it's effect on home landscapes. It also provides lots of period examples illustrating proper AC landscaping, along with historically appropriate garden accessories (fencing, etc). The book provides lots of pictorial examples of modern AC landscaping executed in keeping with the AC movement. I

find myself referring to this book regularly. It's lots of fun!2 of 2 people found the following review helpful. A gem of a book, particularly if you own a bungalowBy K. HarrigerI'm currently renovating a 1920-era bungalow, and this book has been a real treat and a great resource for planning the landscaping of my property. The photography is absolutely first-rate, and the wide scope of examples provides an overwhelming amount of options to consider. This book is a real treasure for anyone who enjoys the art of the bungalow, whether they're simply a fan, or an owner looking for ideas to improve his or her home. In addition to this book, I also own others in the "series" that deal with the interior design elements.0 of 0 people found the following review helpful. Five StarsBy P. OlearyI love all things aC. Very good.

This third volume in a popular series highlights the special beauty and enduring appeal of Arts and Crafts bungalow gardens. Matching Paul Duchscherer's authoritative text with striking photographs by Douglas Keister--the team that made *The Bungalow* and *Inside the Bungalow* so successful--*Outside the Bungalow* will captivate the ever-growing number of Arts and Crafts aficionados. In it the garden, with its "nature-friendly" charm and character, takes the spotlight as an integral part of bungalow living. Focusing on the fixed architectural or "hardscape" elements, striking ensembles include entry gates, arbors, portals, and driveways; wooden fences, screens, railings, and masonry walls; paths, walkways, and steps; ponds, fountains, bird baths, swimming pools, and spas; courtyards, patios, gazebos, pergolas, and porches; outdoor furniture from benches to swings; and details from treehouses and potting sheds to lighting and garden accessories. Special chapters feature gardens of the famous Charles and Henry Greene houses, and a turn-of-the-century plant list. Portraits of gardens in context with their vintage bungalows range from glorious color photographs to hand-colored postcards of the period and will thrill architecture or design professionals and amateurs eager to recapture the romance of "bungalowmania."

.com Open the door and step outside to see how the Arts Crafts aesthetic has shaped gardens over the years as surely as it has influenced architecture and furniture. This follow-up volume to *Inside the Bungalow: America's Arts and Crafts Interior* shows the characteristic brick, tile and wood, wide-porched exteriors of the bungalow style half-buried beneath wisteria vines, arbors, flowers, and foliage. The bungalows that the gardens surround range from the archetypal dark, timbered wood and stone to the rustic, grand, and even Southwestern, offering a visual feast of gardens to match. The authors emphasize not specific plants, but the architectural elements and style of such gardens: tiled fountains, pergolas, pathways, and the use of stone, timbers, and courtyards to tie house and garden together. Both text and photos focus in on details like outdoor light fixtures, hose bibs, mailboxes, birdhouses, fences and lattice as part of the characteristic Arts Crafts aesthetic. The "Garden Portraits" chapter includes garden plans as well as photos of bungalow exteriors from Seattle to southern California, emphasizing that it is not the plants themselves but how they are grouped to emphasize the architecture and the hardscaping that creates an Arts Crafts garden. Still, there are certain plants that appear over and over again in the photos, and have the right look for such gardens--ornamental grasses, vines, climbing roses, and plants with bold structural foliage like iris, ferns, clivia, and hosta. The charming chapter on potting sheds and tree houses, as well as the exuberant and colorful plantings throughout, go a long way toward explaining why people have been so captivated by "bungalowmania" for more than three decades. --Valerie Easton
