I was looking for a very simple step by step for beginners with simple projects This one says book 1, but I think it would be better for someone who has some experiences with paracord ties. Someday maybe I will work my way into it.2 of 2 people found the following review helpful. The "feeling" in whatever we do.By GEOKLVRegardless if someone is fully into it, or simply not, this composition is a small treasure. Ditto are the all the books from J.D. Lenzen. I recently (a mere month ago), accidentally realized that

paracord weaving holds a great fascination for me. It all started by watching J.D.'s YouTube videos. Getting his books was a no brainer. The Man has deep knowledge, inspiration and immense "feeling" in whatever he does around this subject. Just like his videos, the books are concise, well structured and fabulously illustrated. Go for it; go for all. And above all, enjoy!!! George from Greece. 1 of 1 people found the following review helpful. Not Quite the Youtube Videos, but Very Good By elhighJD's style for demonstrating tying these knots on his YouTube channel "Tying It All Together" is perfect: not too fast, no irritating voiceover, and a polite pause at every step to clearly show what has happened and how things should look. The book gives up a little bit to video. Being able to see how the hands go from step to step helps more than you might expect, but still the book does a very good job of showing the pauses. Sometimes you have to peer at a photo for a minute to figure out what happened...but nothing has come up indecipherable, so it must be working, right? Ever since I figured out how to make these fusion ties, I sometimes whip out a couple while watching TV. My mom was so interested in them I invented a new one (really just a narrow hand-woven band with a tearaway core for rapid deployment), wrapped it and a copy of the book in a box and sent them to her for her birthday. THAT's how highly I regard the book: it's good enough to give to my mom.
