**Todd Mikkelsen : Paracord!: How to Make the Best Bracelets, Lanyards, Key Chains, Buckles, and More**  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Paracord!: How to  
Make the Best Bracelets, Lanyards, Key Chains, Buckles, and More:

6 of 6 people found the following review helpful. Great photos and instructionsBy Andra StollerGreat photos and  
instructions. I like the quick release band instructions. This also included info about making paracord products that I  
would not have considered such as shrinkage amounts for different colored cords.5 of 5 people found the following  
review helpful. Better than "Outdoor Gear".By CustomerThis is a better book, but you will still have to go on the Web  
for good step by step instructions.3 of 3 people found the following review helpful. A GREAT book!!By M. DollThis  
is the best book ever for paracord projects. My 13 year old son uses this book constantly. It is in full color and easy to  
understand.

Todd Mikkelsen's *Paracord!* offers a diverse collection of projects that utilize parachute cords known around the world as paracord. Used by paratroopers and other military personnel during World War II, this lightweight nylon rope is now one of the most sought-after materials by crafters. Its durability and flexibility make it perfect for creating everyday accessories such as belts, bracelets, buckles, necklaces, dog leashes and collars, key chains, and more. As you will see in Mikkelsen's book, this rope comes in various colors, from army green to hot pink, making it easy to personalize every type of project. In *Paracord!*, you'll find step-by-step instructions that take you through every project. Each step is accompanied by a photo that clearly illustrates the process. In addition to learning how to make these accessories, Mikkelsen also includes introductory chapters preparing your paracord for crafting, tying different types of knots, and caring for and cleaning your completed paracord projects.

"It's a rare book that has the potential to interest young people who like to make bracelets and lanyards out of colorful cord as well as the survivalist/prepper audience, but this one just might." *Library Journal*
