This is a must have tool for every beginner and a great reference for every level of experience. I had just received my book and took it with me to a scheduled long arm class and on the first page of the instructional hand out was a recommendation for this book!! Much of the class referred to technique taught by Sally Terry. 8 of 8 people found the following review helpful. Best teacher for this subject I intend to purchase all her books on machine quilting. By Alanna Levesque This quilter/writer is the best on the subject of machine quilting. Her "Hooked on Feathers" is also outstanding. Inspirational! I have tried this technique with great success, immediately. I am purchasing more products from her website. I am also scheduled to take a class this fall. I wish it were tomorrow. I feel very appreciative that I found her products. I will buy hers rather than to search for another author's because of her teaching skills and encouraging words. Throughout her childhood, she made all her own clothing and even tailored her own suits. At high school graduation, the only clothes in her closet that she had not made were a jacket, a pair of denims, and a bathing suit. Her only lament is that she never got to shop for clothes. After graduating from Drake University, Sally attended graduate school in multimedia at the University of Grenoble in France.
