spent a lot of money over the years on perfumes and body sprays ... I never entertained the thought of making the product myself, until I read this book. I found Chapter 1, "The Brief History of Perfume", very interesting as well as Chapter 7, "Creating Aromatherapy Perfumes". The author includes easy to follow recipes for many different types of fragrances ... floral scents, fruity scents, and oriental scents. Packed full of great information on the subject of making your own perfumes at home, this book will be a great addition to any "how to" library. 3 of 3 people found the following review helpful. Wonderful Book to Own!!! By Anne Stevens I thoroughly appreciate what the author has done in this book. I enjoy different fragrances and have often wanted to create my own scent. In the past I have looked for books that would help me create my own perfumes but to no avail. Most of the other books either didn't have enough information or were lacking key steps, not with this book. The author walks you through each step as well as stress the importance of having your area set up for creating your perfumes, which is extremely important. I also like the fact the author takes time to talk about the history of perfumes. I always believe if you want to create a product you need to know the history of what you are creating. Trust me when I say, you will not find another book like this one were the author is extremely knowledgeable on the topic. If are looking for a book to help you create your own unique smells this is definitely the book. 0 of 0 people found the following review helpful. Overpriced pamphlet By Rebecca This is a pamphlet, not a book! It's overpriced.
