Neuman I chose the rating only in comparison to the above precedent book which is also by the same author. The book has lots of detailed color photos with paragraphs of good techniques attached. But the first book appeals more to the modeler in me in its description of the processes to complete a model and personal information about the author as a modeler. And though the author is a miniaturist the models described while excellent were a bit too small for me. 2 of 2 people found the following review helpful. Excellent Book By Jeremiah Warthog This is an excellent, detailed book on ship modeling. Many color photographs, unlike most ship modeling books. Presentation on tool use and technique are very good. If buying only one book on ship modeling, I would

choose this one. 1 of 1 people found the following review helpful. Small but magnificent By ex-librarian another outstanding book from the master modeller whose masterpieces are seldom longer than a foot but look as though you could walk around on the decks.

Step-by-step, this ship modeler's manual explains how to build a 1/16th scale model of the American privateer schooner Prince de Neufchatel. One of a new class of large, fast, and seaworthy schooners that first made their appearance in the War of 1812, the ship had a short but notoriously successful career that earned a permanent place in U.S. history. Written by the world-renowned ship modeler Philip Reed, the book explains how to build two versions of the schooner: a waterline model and a full-hull display model. The author's selection of a relatively simple vessel will encourage even the less-experienced modeler to take on the challenge of a scratch-built hull. Beautifully illustrated throughout with hundreds of color photographs, the guide passes along a wealth of information that Reed has learned over the years to enable modelers of all skill levels to tackle all aspects of building a small fore-and-aft rigged vessel. Like his first book on sailing Men-of-War, this manual is certain to become a classic for ship modelers everywhere.

About the Author Philip Reed is a professional model maker whose work is found throughout Europe and North America and includes restoration projects for leading galleries and museums.
