And I am happy I did.....it's everything and more! I like the style of the book with personal bits offered by both authors, the detail and 'user-friendly' instructions, the honesty about what works and what doesn't, art projects incorporating photos and mixed media 'stuff', and the photographs are standouts for me. I am familiar with Photoshop, but for those that are not, the instructions (along with photos of what you'll be looking at on your computer) are easy to follow. This book is a MUST HAVE and I'm so

Photo Craft: Creative Mixed Media and Digital Approaches to Transforming Your Photographs By Karen Diwan I love this book! Christy and Susan are two extremely creative women who share everything from the basics of photography and digital photo editing to how to use your photos to create beautiful art. The chapter on composition really helped me to focus on framing my photos with an eye toward balance and looking up instead of straight at the subject being photographed. Chapter 4 is all about Timeless Photographic Techniques and how to apply them. Liberally sprinkled throughout this book are beautiful photographs taken and altered by both Christy and Susan and gorgeous mixed media art techniques that are stepped out and very easy to understand and execute. This book is a must have for anyone who needs a go-to reference for photography, editing and how to use your photos in mixed media art. 1 of 1 people found the following review helpful. Photocraft By Elayne Koenigsberg I recently received Photocraft - creative mixed-media and digital approaches to transforming your photographs by Susan Tuttle and Christy Hydeck....I haven't had time to do any of the projects yet but the book is yummy. It has really easy instruction to use Photoshop Elements and that makes me really happy because I can get lost quickly when photo editing. I also love that there are many contributions by several of my favorite artists. I adore mixed media art and photography and know this book will add lots of techniques to my goody bag of tricks...can't wait to experiment....good job girls!!!
