Nothing new, creative or appealing here. You may want to paint with a credit card, apply ink with bubble wrap, make gelatin prints and paste paper, or stamp repeat images on plain paper for gift wrap. If so, you'll find it done better in many other publications. The projects are very simple and not very attractive. I feel like I've wasted my money on this book. I really prefer having and holding a real book to looking online for this kind of guidance - but in this case I'd make an exception. There are much nicer projects online. With all the 5-star reviews, I was expecting some exceptional projects, but there isn't one creative idea that's worth trying unless you think that putting multi-colored splotches of paint on a leather circle would make a nice coaster or dipping the toe of your shoe in swirls of floating nail polish makes something you'd be willing

to wear. Please save your money and avoid this book.0 of 1 people found the following review helpful. An excellent book. I am using it to come up ...By hawkeikeAn excellent book.
