From CRC Press : Polymer Blends and Alloys (Plastics Engineering) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Polymer Blends and Alloys (Plastics Engineering):

Distinguishing among blends, alloys and other types of combinations, clarifying terminology and presenting data on

new processes and materials, this work present up-to-date and effective compounding techniques for polymers. It offers extensive analyses on the challenging questions that surround miscibility, compatibility, dynamic processing, interaction/phase behaviour, and computer simulations for predicting behaviours of polymer mixture and interaction.

"...a quick and efficient way to increase...awareness of new developments in the polymer blends and alloy field...an excellent resource." -- Polymer News
