Maurice Mathon : Pop-Up Cards and Invitations before purchasing it in order to gage whether or not it would be worth my time, and all praised Pop-Up Cards and Invitations:

I made the honeycomb which was quite a challenge. It came out quite well. The recipient loved it. I can't wait to start another project. 4 of 4 people found the following review helpful. Fun Cards with easy to follow instructions By Diana Document I bought this book because I have loved pop up books all my life and my hobby is scrapbooking. This book offers a lot of simple, easy to follow instructions with lots of pictures to follow along. It also contains the templates for the various card projects, which you can enlarge. It clearly explains everything you need to complete each card step by step. The first chapter provides a list

of some basic tools you will need (not many). I had lots of fun making these cards. I have bought other pop up card making books and this is one of the best. The cards are beautiful and the templates make it easy to make them. 4 of 4 people found the following review helpful.
