We have all put in our requests for the items we liked best. Easy to read the instructions and plenty of pictures to visualize. The book arrived promptly even during a busy buying season.1 of 1 people found the following review helpful. Love this book!By Melanie OlivieriI love the step by step instructions with the photos. Five StarsBy linda porterGreat book

Wire can make distinctive jewelry, table accessories, candleholders, frames, lampshades and lamp bases, and all sorts of interesting containers, including baskets, bud vases, and bottles. Each project showcases wire's versatility, created simply by bending, wrapping, and forming it. Complete patterns come with instructions and photos that display shiny

gold, silver, copper, brass and bronze, and the matte look of aluminum and steel in styles that range from fancy to funky, formal to informal, and traditional to modern. The author lives in Decatur, GA. 128 pages (all in color), 8 1/2 x 10. NEW IN PAPERBACK

From BooklistJust when we thought nothing was truly new under the arts-and-crafts sun, up pops Sterling Publisher with yet another new handmade wrinkle. This time, the material of choice is wire--as in screens, meshes, and filaments. The author is a Georgia pro who, within her career lifetime, has written more than 2,000 instructions and directed more than 40,000 projects. Tools and equipment are simple, such as glues, pliers, and cutters. Plus the only precaution to take is during the snipping stage, where gloves and goggles are advised. Otherwise, the home is the wire worker's oyster. Baskett conjures up more than 60 fairly easy-to-follow patterns, from a wrapped amber necklace and decorated goblets to a wondrous mesh handbag and a utilitarian votive holder with flair. Metric conversion chart appended.
