My kids love science and science experiments are the icing on the cake for them. My daughter loved the homemade elephant toothpaste and writing with invisible ink. This book is well written and both of my kids loved it. This is a great book!0 of 0 people found the following review helpful. this was excellent! Kids love magic. With science experiments, you can create magic right in the comfort of your home and leave your child in awe! The best part about science experiments is that your child will learn something while having fun. While they may be thinking that flowers changing colors is magic, this is a great opportunity for you to explain to your child how plants transport nutrients through their stems. Even if you and your child are not experts, you can do fun experiments together with amazing results.
